General view

Total viewpoint

Elements

Element	Type
dict.conf	Artifact
dict.data	Artifact
dict.exe	Artifact
Executable application	Application Component
Managing files	Infrastructure Service
OS API	System Software
PC	Device
Reading from a standard input (keyboard) and writing to a standard output (monitor)	Infrastructure Service
Reading/writing textual information	Application Service
Terminal	System Software
Textual user interface	Application Interface
Unix-like OS	System Software
User	Business Role
User configuration	Data Object
User data (words and translations)	Data Object
User interface logic/general (main) logic module	Application Component
Viewing/adding/deleting words and translations	Application Function
Viewing/changing user preferences	Application Function
